"ORCHIDHAVEN"

SPRING LIST - MAY, 1947

This is our first listing for 1947 of Seedlings from 1 1/2" pot size and up. Other lists later in the year will be considered as additions. We have tried in our brief descriptions to proffer as much information as possible about what may be expected from these seedlings when maturity is reached.

Former results have been our chief guiding influence in the making of these Hybrids. Great care has been given to the selection of parents so as to insure - FINE GROWTH - PRODUCTIVITY - TEXTURE - COLOR - SIZE - and last but certainly very important - SEASON OF BLOOM.

We are equipped to ship anywhere in the United States and its possessions, Canada, Central and South America, Cuba and the Philippine Islands. We prefer to ship plants out of pots, placing plants with compost intact in paper pots. This will tend to lower cost of shipping when distance is great. Packing is free of charge for all plants on this list. Prices are F.O.B. Bergenfield in U. S. Dollars.

Overseas shipments should be accompanied by estimated shipping costs so shipment may be prepaid to avoid delays. Please clearly indicate method of shipping when placing orders. Season of shipment has already started and will continue until cold weather, usually about November 15th.

From time to time we have available limited quantities of Community Pots. If interested please inquire.

Second choice should be included in selecting varieties to replace any which may be sold out.

We welcome visitation—by appointment, please.

Cross No.	Name, Parentage and Description	Size	Each
425	LC. PRINCESS MARGARET X C. ENID Uniting these two already great orchids results in the hybrid named Lc. George Baldwin. Little need be said in its behalf. In the short time of its existence it has already won a great many awards. Our firm has raised and flowered several batches of this great hybrid and through the knowledge gained thereby feel qualified in repeating this great cross from time to time. Season is September to December — Flowers are always large and well shaped — Substance is excellent. Color mostly dark.	1½" pots \$4.00 2½" pots 7.00 3" pots 12.00 3½ & 15.00 4" pots to 25.00	
426	C. CLEMENTINE GOLDFARB X C. RITA SLADDEN This cross should result in a very strong growing pure white for fall and early winter. Flowers will be large and of good substance.	1½" pots 4.00 2½" pots 8.00	
429	LC. WALTER WINCHELL (C. TAPPAN X LC. DUPRESAN) This Hybrid was pictured in one of our recent advertisements. It is a very large, well shaped, dark flower of great texture. Growth is exceptional.	2½" pots 10.00 3" pots 15.00	
430	LC. ALTESSE X LC. MONARMUS This should be a sure winter bloomer of dark color and great substance.	3" pots 10.00	
431	C. TREDIA X LC. ALTESSE Presence of C. Leda in C. Tredia will go far in imparting high color to this Hybrid. All of the components bloom in the winter. The resulting Hybrid should be a fine grower as all of the parents are excellent growers.	1½" pots 4.00	
432	LC. JANE DANE X LC. CANHAMIANA ALBA One of the hardest seasons to breach with a good white with a colored lip is the late winter and early spring months. After a great many attempts to make the above Cross we have finally succeeded in making, what we in our opinion believe, will be a most outstanding Cross in this class. Season should be February to April.	1½" pots 5.00 2" pots 8.00 2½" pots 12.00	
433	C. ENID X LC. DUPRESAN Two very strong growers have been used here to make this Cross. Resulting Hybrid should be of medium to dark color. Size should be very good, as both parents are inclined to be large.	1½" pots 4.00	
441	C. MOSSIAE X C. GIGAS — C. ENID No collection would be complete without C. Enid. We make this Cross from time to time in order to insure the amateur and market grower a dependable supply.	1½" pots 4.00	
451	C. WHITE EMPRESS (F.C.C.-R.H.S.) X C. BELLE JONES ALBA A pure white which will bloom February through April should be the result here. Both parents are excellent growers.	1½" pots 4.00 2½" pots 9.00	
455	C. ENID X C. TRIANAE Season is the outstanding part of this Cross. It is a sure midwinter FLOWER. Growth is always excellent.	1½" pots 4.00	
459	LC. ALTESSE X C. REMY CHOLLET An Abundance of Remy Chollet in Lc. Altesse plus the extra part included in this cross should make a very desirable winter hybrid. Both varieties are very exceptional growers. Colors will be mostly dark.	1½" pots 4.00	
460	(C. RHOERSIANA X C. MAGGIE RAPHAEL) X LC. ALTESSE Both parts of this cross have always bloomed between November and December. A most desirable time for both the amateur and market grower. Vigor is assured because of the strong growing character of both parents.	1½" pots 4.00	

Cross No.	Name, Parentage and Description	Size	Each
461	C. REMY CHOLLET X C. MOSSIAE Hybrids for the Easter season will be assured by this cross. In other words, here will be a glorified Mossiae.	1 1/2" pots	\$4.00
464	LC. SAGANA X C. MOSSIAE Earlier results of this cross has prompted our repeating this grand cross. Season is definitely Easter. Some very exceptionally fine colors were noted in our earlier batch. It will make good Mossiae replacement material.	1 1/2" pots	4.00
468	C. HARDYANA ALBA X LC. JANE DANE Union of these two very fine parents should result in a fine white with colored lip for September, the Month of Weddings.	2 1/4" pots	8.00
476	DEN PHALENOPSIS DIXON X DEN PHALENOPSIS DIXON Most everyone has heard of the very exceptional batch of extremely dark Den Phalenopsis which was raised by the Dixon estate. We have repeated this cross with the greatest confidence. Season for blooming is September and October. Flowers are exceptionally large. We offer some very large plants in community pots at \$2.00 per plant.	1 1/2" pots	4.00
477	C. RITA SLADDEN X C. BARBARA DANE Season of blooming will be the important part of this fine cross. We expect that it will bloom through the months of November and December. Flower should be of heavy texture.	1 1/2" pots	4.00
478	LC. PRINCESS MARGARET X C. ENID We refer you to description under No. 425.		
479	C. RITA SLADDEN X C. CLEMENTINE GOLDFARB This is a reverse cross of No. 426. In either case we insist that this will be one of the strongest growing white crosses.	1 1/2" pots	4.00
480	(LC. AUREOLE X C. ROBERT H. JEWELL) X C. DOWIANA Very few yellows are strong growers. Therefore we have selected two of our strongest growing yellows for this cross. Result should be a strong growing yellow. Season will be fall and early winter.	1 1/2" pots	6.00
481	(C. EMPRESS FREDERICK X BC. AUREOLE) X C. DOWIANA We have used a fine quality bronze on a highly colored C. Dowiana. Season should be October and November. We expect some very unusual seedlings from this cross.	1 1/2" pots	6.00
482	(C. CHELSEA X LC. DINAL) X C. ENID The fine growing qualities of C. Enid merged with the other hybrid used here should make a very desirable hybrid for late spring. Flowers should be very large and of exceptional substance.	1 1/2" pots	4.00
483	LC. MONARMUS X C. BELGICA Winter season is the most desirable for most cattleyas. The above cross will assure an abundance of flowers for this season. Form of this cross should be very fine. Size of the resultant flowers should be very large. Color will run to the darker shades of lavender.	1 1/2" pots	4.00
484	LC. HILLARY F.C.C.-R.H.S. X C. ENID An earlier batch of this cross which has flowered is one of the outstanding new hybrids. We have repeated the cross with the same Lc. Hillary also using a very similar C. Enid. Flowers are very large and dark growth is outstanding.	1 1/2" pots	5.00
486	LC. CYNTHIA F.C.C.-R.H.S. X (C. TRIANAE REIN. X C. DIONYSIUS ALBA.) Both components of this cross are fine growers and winter bloomers. Fine quality flowers should be the expectation here.	1 1/2" pots	4.00

Cross No.	Name, Parentage and Description	Size	Each
487	C. LADY ALEXANDER ALBA X C. ROYAL HAROLD ALBA A need for a very free growing white for the fall wedding season prompted this cross. Both parents are paper white in the petals and sepals with very brilliant lips.	1 1/2" pots	\$4.00
488	C. EDITHAE #1 X C. MOSSIAE "WAGNERII" An earlier batch of this cross has already bloomed. The excellent results obtained guided us in remaking the cross with the same VERY LATE Edithae and the same Mossiae "Wagnerii." Flowers are large, well shaped with very good texture. Season is Easter and after Easter which makes this cross a valuable one. It has been named Dorothy Mackaill.	1 1/2" pots	5.00
489	Reverse of #487 (See #487 for description.)	1 1/2" pots	4.00
490	LC. HILLARY (F.C.C.-R.H.S.) X C. MT. ROYAL In make-up this cross is very similar to #484 except that the use of Mt. Royal on the one side will tend to make the blooming date about one to two months later. The infusion of Dowiana in the Raphaelii which in turn made the Mt. Royal should impart fine color to the resultant hybrid.	1 1/2" pots	4.00
491	L. PURPURATA "ORCHID KNOLL VAR." X C. MOSSIAE "REIN-ECKIANA" (YOUNG'S VAR.) An earlier lot of this particular cross has resulted in making THE finest Canhamiana Alba in existence. We have a very limited lot of this cross to offer. - Community Pots 2.00 per Seedling.	1 1/2" pots	5.00
492	LC. HELEN WILMER X C. MOSSIAE R.E.P. The records made by Lc. Helen Wilmer as a parent are beyond question. The variety used in this case was our named variety "Orchid-haven." This was used to make our celebrated Lc. Frank J. Lind. The Mossiae used is very dark and has proven to be a very fine parent in other crosses.	1 1/2" pots	5.00
493	C. GRAVESIANA ALBA X C. MOSSIAE "WAGNERII" Our quest here is for a good growing white for the Easter season. Both parents are strong growers and they are proven white breeders.	1 1/2" pots	4.00
494	C. EDITHAE #1 X C. INTERTEXTA ALBA Here we again use our very late Edithae #1. The Intertexta Alba is a proven white breeder which always blooms during the Spring months. Season should be March, April and May because of the variable blooming habit of Intertexta Alba.	1 1/2" pots	4.00
495	C. MOSSIAE REIN, (YOUNGS VAR.) X C. PRISCILLA ALBA We have raised and named several successful batches of this hybrid. Results have been most satisfactory. Season is March and April, also early May.	1 1/2" pots	4.00
496	(C. GRAVESIANA X C. TRIANAE BROOMHILLS) X C. MOSSIAE WAGNERII (VAR. ORCHIDHAVEN) Here again we make another bid for a fine quality, Spring blooming pure white. All the parents are proven white breeding stock. Season will be March through May.	1 1/2" pots	5.00
498	C. SPECIOSISSIMA ALBA F.C.C. X C. MOSSIAE "WAGNERII" Season of this pure white hybrid has proven by earlier crosses to be the Winter and Spring months.	1 1/2" pots	4.00

Cross No.	Name, Parentage and Description	Size	Each
499	C. DOWIANA X C. MOSSIAE BRILLIANTISSIMA Each year we repeat some of the earlier successful crosses. In this case we remake C. Empress Frederick with the finest parents we have at our disposal.	1 1/2" pots	\$4.00
500	C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. ENID ALBA This cross will remake an earlier very successful cross called Ardmore Alba. We have used very exceptional parents to remake this cross. Our stock of this cross is very limited.	1 1/2" pots	5.00
501	LC. SCHROEDERAE "THE KING" X C. PRESIDENT WILSON ALBA The result looked for here is a very good white with a highly colored lip. Great care was used in the selection of the C. President Wilson Alba to go with the very fine Lc. Schroederae "The King."	1 1/2" pots	4.00
502	LC. SAGANA "VAR. EASTER" X C. MOSSIAE This is a repeat cross for us. We have made it again because all of the earlier batches have proved most successful in making a large dark free growing hybrid, for the Easter season.	1 1/2" pots	4.00
503	C. EDITHAE #1 X (C. GRAVESIANA ALBA X TRIANAE "BROOM-HILLS VAR.") We are positive this will make a most desired white Cattleya for the late Winter and early Spring months. Earlier use of the above parents, gives us this extreme feeling of confidence.	1 1/2" pots	4.00
504	C. HENRIETTA PATTERSON X C. MOSSIAE "WAGNERII" Here again should be a fine white Cattleya for the Easter season. Both parents are excellent growers.	1 1/2" pots	4.00
505	C. MOSSIAE #24 X C. TRIANAE "G" Here again we repeat with confidence an old dependable cross. This cross is made especially for its Winter blooming and strong growing qualities. Season is from January through March. We have used two very fine species for this first generation cross.	1 1/2" pots	4.00
506	C. ENID ALBA X C. GIGAS F.M.B. A Dependable white with a brilliant lip will be the result here. Both parents are excellent growers.	1 1/2" pots	4.00
507	C. MOSSIAE "REINECKIANA" (YOUNG'S VAR.) X C. GIGAS F.M.B. We repeat Enid Alba with excellent parents.	1 1/2" pots	4.00
508	C. EDITHAE #1 X C. TRENTINO One of the outstanding features of this particular cross will be exceptionally strong sepals. C. Trentino always imparts this habit when used as a parent. We again use our proven and very dependable Edithae #1.	1 1/2" pots	4.00
510	C. HENRIETTA PATTERSON X C. MOSSIAE "WAGNERII" Note - See #504 for description.	1 1/2" pots	4.00
511	C. TRENTINO X C. MOSSIAE "WAGNERII" We use here the same fine Trentino which was used in #508. An outstanding Mossiae Wagnerii which is a proven white breeder was also used.	1 1/2" pots	4.00
512	BC. CLIFTONII "MAGNIFICA" X C. MOSSIAE "BERGENFIELD" We repeat Bc. Imperialis using only our finest parents. Mossiae "Bergenfield" is a very dark Mossiae.	1 1/2" pots	4.00
513	C. SPECIOSISSIMA ALBA F.C.C. X C. MOSSIAE "WAGNERII" Note - See #498 for description.	1 1/2" pots	4.00

Cross No.	Name, Parentage and Description	Size	Each
9424	LC. GOLDEN GLEAM X BLC. MITHRA Fine yellow Blc. expected. Supply very limited.	1 1/2" pots	\$5.00
9452	C. EDITHAE X C. MINNEHAHA F.C.C. Two exceptional whites were used to make this cross.	1 1/2" pots	4.00
9463	C. WHITE EMPRESS X C. S. E. ENDICOTT Season for this white will be Fall and Winter. Both parents very strong growers.	1 1/2" pots	4.00
9466	C. SNOWWHITE X C. EDITHAE If a pure white is wanted for midwinter, this particular cross should be a good bet. Little need be said about the good growing habits of C. Edithae progeny.	1 1/2" pots	4.00
9468	C. EDITHAE X C. LADY VIETCH One wanting to round out their collection of pure whites will do well in including this fine cross. Blooming time will be Winter. Growth is sure to be exceptional.	1 1/2" pots	4.00
9469	BLC. SEDENII X BC. SEAFOAM This is a very unusual cross. The union of two parents containing Bras-so parentage. We have a very limited supply of this cross.	1 1/2" pots	5.00
9471	C. SNOWWHITE X (C. TRIANAE X C. EDITHAE) Practically all the components of this cross are Winter bloomers. Growth should be very good.	1 1/2" pots	4.00
9474	C. EDITHAE X C. EDITHAE The good properties of C. Edithae prompted the thought to remake this old favorite hybrid. Season, of course, is Winter - growth has always been good.	1 1/2" pots	4.00
9491	C. EUCHARIS X C. MOSSIAE "WAGNERII" An earlier batch of this same cross has turned out a very fine Spring pure white. The season of blooming is April and May.	1 1/2" pots	4.00
9494	C. PRISCILLA ALBA X LC. HASSALLII ALBA Season of this white sepaled and petaled colored lip Laeliocattleya is expected to be varied because of the influence of C. Priscilla Alba. Both parents are paper-white in the sepals and petals.	1 1/2" pots	4.00
9500	LC. DERNA X LC. LUMINOSA A good yellow Laeliocattleya is expected here.	1 1/2" pots	5.00
9507	C. CELEA X (C. TRIANAE X C. EDITHAE) Well formed flowers of medium size are expected of this cross.	1 1/2" pots	4.00
9513	LC. EVELYN MT. X BLC. APRICA Various shades of yellow are expected here.	1 1/2" pots	5.00
9524	BLC. XANTHEA X BLC. DOROTHY LOW We have a very limited lot of this fine Blc. cross.	1 1/2" pots	5.00
9531	BC. DIETRICHIANA (VAR. SPLENDENS) X LC. NELSON A good Blc. of fine texture and growth is expected here. Supply very limited.	1 1/2" pots	5.00
9545	L. PURPURATA ALBA X C. MOSSIAE "REINECKIANA" A continued demand for Canhamiana Alba prompted the thought to remake this old reliable cross.	1 1/2" pots	5.00
